GO FOR THE HIGHEST AIR QUALITY

Keep it pure with Original Line Filters

ORIGINAL PART

Line Filters

DON'T COMPROMISE

- Line filters keep solid and liquid contaminants out of the compressed air.
- Non-original parts don't offer the same quality of filtration.
- Pressure drops could increase your energy bill.
- Contaminants can put your equipment and products at risk.
- Cheap replacement parts may turn out to be hugely expensive.
- Filter cartridges need to be replaced at the end of their service life.

ON PURITY

- Compressed air purity is vital for your end equipment and products.
- Regular replacement of Original filter cartridges is critical to uphold that purity.
- Original cartridges protect your initial investment.
- Designed to ensure optimal sealing, less leakages and low pressure drop, reducing energy costs.
- The top-quality filter material keeps air contaminants out.
- The corrosion-free stainless steel filter cores offer high reliability.
- Original Line Filter cartridges contribute to the lowest operating cost.

100%

QUALITY CONTROL

6 REASONS TO BUY ORIGINAL

Filtration is not a commodity, it is a
SCIENCE

CONTAMINATION
is all around in compressed air

Low purity can have a
HIGH COST

PRESSURE DROP
means high energy consumption

Our development and manufacturing
COMPETENCE
guarantees the best products

Our filters come with air purity
